

Retrofitting of the tool changing crane

We offer the possibility to retrofit an integrated tool changing crane from the current series. As useful extra we would like to offer this to our customers with older RDK machines. By retrofitting the crane, the CE marking of your machine is fully preserved, as long as no substantial structural changes have been made in the meantime.

Your benefits

- | CE marking of your machine is fully preserved
- | Significantly simplified tool change
- | Easy handling via remote control
- | No separate crane required
- | Faster set-up times

Available for machines

RDK 80k | RDKP 72k | RDK 54k | RV 74d
