

Conversion from Movitrac to Movidrive

The frequency converter Movitrac as well as the associated control cards have been discontinued by SEW and are no longer available. Repairs take a long time and are often no longer possible due to missing spare parts. The result is long machine shutdowns, sooner or later, a machine operation with Movitrac converters probably won't be possible anymore. For this reason, we are offering upgrade packages for the conversion to the new frequency converter Movidrive.

Your benefits

- | Spare parts availability is guaranteed again
- | Avoidance of machine stops
- | Exchange of engines is not needed

Available for machines

already done at: RDM 37/10 | RDM 50K | RDM 54K | RDM 70K |
