

## Retrofitting of air support for UA machines

For our ILLIG sheet processing machine UA 100Ed we are offering a retrofit to protect the sheet and lower heater.

By retrofitting an air support in the UA machine the sagging of the sheet is compensated and the lower heater will not be damaged. Here the film is checked for sagging with sensors and if it is necessary the air will start and support the operation. We recommend the conversion by an ILLIG technician.

### Your benefits

- | Avoidance of downtime
- | Less cleaning effort
- | Work more efficiently

### Available for machines

UA 100 Ed #601-610
